

Thank you for purchasing  
the Lawnifi™

# Spring Box

Lawnifi is a liquid fertilizer program powered by Catalyst Technology. For optimal results, feed your lawn monthly during the active growing season (spring, summer, fall). Simply attach a hose to the sprayer top and apply evenly to your lawn.

## The Spring Fertilizer Box includes:

**2 BOTTLES OF MAINTAIN**

**1 BOTTLE OF BOOST**

Apply one application of Maintain at the start of spring to promote healthy roots and the return of green leaf blades after winter dormancy. In mid-spring, apply Boost to deepen the green appearance of your lawn. Boost will deliver greening benefits to your lawn immediately, and long into the season because of its time-release formula. In late spring, use the remaining bottle of Maintain to prep your lawn for the heat and stress of summer. Our patented nano-fertilizers with Catalyst Technology give your lawn the jump-start it needs to emerge from dormancy, green up fast, and thrive throughout the spring months.

Throughout the seasons, the nutritional needs of your lawn vary as temperatures, soil conditions, and other environmental demands change. Please refer to the application schedule below.

Make the first application of **MAINTAIN** any time in the first few weeks of spring.

Apply the second application of **BOOST** four weeks following your initial application.

Four weeks following your last application, apply **MAINTAIN** before beginning your summer fertilizer maintenance program.
