With Iron

NOTE: Iron (Fe) is a necessary plant nutrient and aids in the greening process, however, it will stain sidewalks, driveways, patios, pavers, concrete ornaments, and other concrete surfaces. Please use caution around these items. Should the fertilizer come into contact with them, USE A BROOM OR BLOWER TO CLEAN THE SURFACE TO PREVENT STAINING -DO NOT WASH THE PRODUCT FROM CONCRETE SURFACES

For Landscaping Color Beds

CAUTION: Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your seasonal color beds, and sweep any product that lands on the driveway, sidewalk, or street, back in to the bed.

Turf

INFORMATION: Apply to dry foliage. To move fertilizer from the Turf Canopy, water in with at least .15" of rain or irrigation, following application. To avoid picking up fertilizer do not collect clippings for at least the first mowing following application. *This product contains IRON, to avoid staining blow off concrete before irrigation or rain.

NOTE: For St. Augustine & Centipede grass use the Low to Medium rate
For Bermuda grass use the High to Medium rate. Spread rates below 4#'s per 1,000 (175# per Acre) can result in poor coverage.

Do not apply in north Florida in winter.

Do not to exceed rates recommended in the document entitled University of Florida, Institute of Food and Agricultural Sciences SL191 "Recommendations for N, P, K and Mg for Golf Course and Athletic Field Fertilization Based on Mehlich III Extractant", revision: October 2013 at <https://edis.ifas.ufl.edu/ss404>.

Use in accordance with the recommendations in "Best Management Practices for the Enhancement of Environmental Quality on Florida Golf Courses" at https://ffl.ifas.ufl.edu/pdf/DEPGolfCourseBMP_Rev10_12_WEB.pdf.

Do not to exceed rates recommended in the document "Florida Friendly Best Management Practices for Protection of Water Resources by Green Industries" at <https://ffl.ifas.ufl.edu/pdf/grn-ind-bmp-en-12-2008.pdf>.
